Growth Rate: Moderate
Soil: Acidic
Drainage: Well drained
Ozone: Tolerant
Breakage: Resistant

'Fall Fiesta'™ is a 1998 introduction from our friends at Bailey Nursery. Its main attraction is its fall color, a brilliant display of red/orange. Fall color for 'Fall Fiesta'™ is said stand above the other Sugar Maple varieties, which are all exceptional to begin with. And you can see how deep green and glossy the leaves are. The leaves are also very thick, thus resistant to leaf tatter and leafhopper damage. 'Fall Fiesta'™ is also very vigorous, callipering faster than most other Sugar Maples. definite plus for the grower. This tree also is resistant to frost cracking and sunscald. Robinson Nursery offers 'Fall Fiesta'™ as bare root whips and branched trees.
