

Cherry-Black Tartarian

Zone: 5-8

Height: 25'-30'

Width: 20'-25'

Exposure: Full sun
Growth Rate: Vigorous
Preferred pH: 6-7
Drought Tolerance: Tolerant once established
Drainage: Requires good drainage
Preferred Soil: Silty to Clay Loams
Insect Pest: Aphid, Caterpillars
Disease Problems: Brown Rot, Bacterial Canker
Fruit Color: Red
Pollinators: Bing, Van, Stella, Rainer
Production: 3-5 years
Harvest: June

Photo: Tates Trees

Black Tartarian produces dark red, sweet, juicy, flavorful cherries. Very productive, you may harvest 2 lbs. per branch. Perhaps a little hardier than other sweet cherries, Black Tartarians are a favorite in colder areas.
