

## Magnolia lilifolia x M. Stellata

## 'Ann' Magnolia

Zone: 4-7

Height: 8'

Width: 10'

Crown: Upright, round  
Growth Rate: Moderate  
Soil: Loam, clay, sand  
pH: Acidic  
Drainage: Well drained

One of the "Girls" introduced by the USDA, 'Ann' is covered with 7"-9" lavender blooms in late spring, after threat of frost. After bloom, deep green leaves come on, and then 'Ann' re-blooms sporadically throughout the summer. Blooms are fragrant! She requires little maintenance and is adaptable to soils, moisture and otherwise poor conditions. 'Ann is sometimes vulnerable to Powdery Mildew.
