

Magnolia x loebneri

Zone: 5-8

Height: 20'

Width: 20'

Crown: Round

Growth Rate: Moderate

Soil: Clay, loam, sand

pH: Acidic, slightly alkaline

Drought: Moderate tolerance

Drainage: Well drained

Breakage: Resistant

Pests: Few if any

'Merrill' Magnolia

'Merrill' is one of the prettiest Magnolias. In Spring, it is covered with 5"-6" white flowers. There may be a hint of pink at the center and there is a very pleasant fragrance. 'Merrill' is adaptable to many soils, but they should be moist and well drained. Best blooming occurs in full sun, but it will flower in part shade. There are no disease or pest problems with this plant. Transplanting bare root small size 'Merrills' has not been a problem. Robinson Nursery offers 'Merrill' in #2 Grow Ready™ liners.
