

## Malus 'Lollizam'

## Lollipop Ornamental Apple

Zone: 4

Height: 5'

Width: 8'

Crown: Round

Growth Rate: Slow

Soil: Clay, loam, sand

pH: Acidic, alkaline

Drainage: Well drained

Drought: Moderate tolerance

Breakage: Resistant

Disease: Good to excellent resistance

Malus Lollipop® is a dwarf apple with a very compact head. With shearing, it can be even more compact. It is a prolific bloomer with red buds opening to fragrant white flowers. In fall there is an abundance of golden amber small fruit. This apple on a stick is a perfect patio or container tree. Our rootstock is M. dolgo, hardy and adaptable to soils, pH, drainage and drought. Robinson carries M. Lollipop ® grafted on a 42" standard.
