

Malus 'Red Jade'

'Red Jade' Weeping Crab Apple

Zone: 4

Height: 10'

Width: 15'

Crown: Weeping

Growth Rate: Moderate

Soil: Adaptable

Best Feature: Flower, red fruit
against green foliage

Malus 'Red Jade' has one of the most beautiful floral displays of all the ornamental apples. The buds are dark pink, begin to fade to white as they expand, then fade to pinkish white blooms. It is very floriferous and buds and flowers are on the tree at the same time. 'Red Jade' is also a weeping form. It will grow as tall as it is trained, then graceful branches weep to the ground.

During the late summer, bright red small fruit appears for a perfect foil for the bright green foliage. Fall color is yellow, and the fruit has been taken by the birds shortly thereafter.
