Foliage: 8" to 12" long

Flower: Inconspicuous

Fall Color: Yellow

Soils: Tolerant

Roots: Can lift concrete

This noble tree has fallen on hard times of late. It is so huge that many city foresters no longer allow it. It's a vigorous grower and can be up to 2" caliper in two years. It has a tendency to form a single leader but needs staking and pruning. 'Bloodgood' has beautiful jigsaw puzzle bark and thrives in tough urban conditions. Our trees are grown from cuttings and are available in branched and whip trees.
