

## Ulmus 'Morton Glossy' - Triumph Elm

Zone: 4-9

Height: 60'

Width: 40'

Exposure: Full sun

Crown: Upright

Growth: Fast

Soil: Adaptable

pH: Acid to alkaline

Drainage: Will take some standing water

Drought: Tolerant once established

Breakage: Very strong branches

Pests: Resistant

Disease: Very resistant to DED

This strongly upright grower is appreciated by growers because it is easier to grow than other more round headed trees. Its adaptability to soils, drought and varied pHs make it very useful in urban conditions. There is resistance in many areas to planting Elms, but these disease resistant varieties should be used more.
