Width: 35'

Crown: Upright, oval

Growth: Vigorous

Soil: Clay, loam, sand

pH: Acid, some alkaline

Drainage: Well drained

Drought: High tolerance

Heat: High tolerance

Breakage: Resistant

There are a good many features for Bosque® Elm. First, its habit is upright oval, always attractive in today's tight landscapes. Second, the foliage is always attractive, bright green going to golden yellow in fall. Next, and probably most noticeable, is the exfoliating bark, with tones of orange/brown, gray and green. This tree is extremely drought and heat tolerant, doing very well into the deep South. It may be a little tender in the North and suffer transplant shock, so Robinson Nursery is offering Bosque® as #3 Grow Ready™ liners.
