

## **Acer rubrum 'Autumn Spire' 'Autumn Spire' Red Maple PP7803**

Zone: 3

---

Height: 50'

---

Width: 25'

---

Crown: Broad Columnar  
Seed: Seedless  
Soils: Clay, Loam, Sand  
pH: Acid  
Drainage: Wet soils ok  
Growth Rate: Moderate

Autumn Spire has at least four great qualities: Upright form, Hardiness, Bright Red Fall Color, and it is Seedless. Autumn Spire is a Minnesota selection from the University of Minnesota, so you know it's going to be hardy. It's fall color, like most Red Maples, is wonderful. The leaves turn color earlier than other Red Maples. Upright trees have become very desirable, so Autumn Spire is usually sold very quickly. Besides that it has an interesting bright red bloom on bare wood, is seedless, thrives in excessively moist conditions and is drought tolerant.
