

Wholesale Catalog Fall 2023-Spring 2024

Dear Customers and Friends,

What a joy it is to be a part of an industry with incredible people, producing world-changing products that make our communities happier, healthier places to live. We would like to thank all of you for partnering with us for another great year.

Innovation is one of our core values at Robinson Nursery. Research and development are an integral part of what we do. In the last 2 years, we have been pursuing new technologies that push our plants to perform; resulting in a higher yield of Premium GRL™ products. As always, the production crew continues to focus on strengthening roots in the field and in our GRL™ line. We are also proud to announce the creation of a database that allows us to track defects throughout the production cycle. Check out the article on page 32 to learn more about our solution to managing inventory, tracking defects, and accurately estimating inventory.

We are passionate about being your partner in growing and we are blessed to have some of the best sales representatives in the industry eager to share their knowledge with you. We encourage you to turn to page 39 and find the contact information for the sales representative in your area. Each of these amazing individuals understand the regional markets, have extensive knowledge of growing practices, and are ready to help where needed.

Thank you for choosing Robinson Nursery. We look forward to growing with you. May God continue to bless you, your families, and your businesses.

Growing people and plants to change the world,

Chris and the Team at Robinson Nursery

Robinson Nursery.
We would love to
have you visit us!

Shade and Ornamental Tree Growers inspired by ingenuity, with passion for progress, trust Robinson Nursery. We prioritize continuous improvement & offer innovative products guaranteed to grow your success. We will never treat you like a number, the Robinson Nursery family is here to grow with you.

It is our vision to create a liner that will stand the test of time. Circling and girdling roots are one of the leading causes of plant death in the landscape. We are continually striving for the ultimate root system.

All GRL™ sizes are grown in air root-pruning containers specifically designed to create a more fibrous root system from start to finish.

In our catalog, varieties that offer GRL™ sizes display the GRL™ logo in the plant description. The specific GRL™ sizes offered are labeled as GRL™ in the size column. If GRL™ it is not specified in the size name, it is a bareroot plant. Much like the catalog, our availability distinguishes GRL™ from bareroot by having a GRL™ in its size name.

Please continue reading to learn more about our Grow Ready Liners™ and the Grow Ready Liner™ Insert. Reach out with questions! We would love to hear from you.

Our exclusive line of Grow Ready Liners™ allow you to plant difficult to transplant varieties with confidence.

Hazelnut shell mulch reduces the need for herbicides resulting in accelerated root growth and enhanced tree caliper.

In addition to our industry leading air root pruning containers, we have developed the GRL™ Insert. This is a porous, light weight fabric insert that roots grow through. When the insert is removed prior to planting, it preforms a final prune for you! Allowing the plant to root out and establish more quickly.

The image on the left was grown in an old pruning container. The image on the right is a GRL™ grown with our air root-pruning container and a GRL™ Insert.

Product will be shipped in our new GRL™ Inserts. We recycle our plastic containers and you will save money on shipping charges with light weight transport. Learn more about the exciting benefits of the GRL™ Insert on pg 3.

Grow Ready Liner™ Insert

Bigger. Healthier. Faster.

This porous, light-weight fabric insert delivers our GRL™ product line to the next level. The Grow Ready Liner™ Insert is placed in our air-root-pruning container at planting. Roots can easily grow through this fabric and still be air-root-pruned by the container. Removal of the insert prior to planting provides a fresh prune.

We are eliminating circling roots that may cause the tree to girdle later in life and providing you with a tree that is ready to perform!

There are many additional proven benefits to be found with the GRL™ Insert. A few of our favorite include:

- We are using approximately 40% less water. The new system retains moisture, allowing the plant to grow more consistently since it has the water it needs when it needs it.
- We are experiencing a much more efficient use of fertilizer with significantly less run-off.
- The fabric helps keep the root system warmer in the winter and cooler in the summer. The temperature control is producing excellent new growth in Spring.

Scan the QR Code for a Video Demonstration on Insert Removal.

There will be many more videos in the future so please be sure to subscribe to our YouTube channel,

www.youtube.com/@robinsonnursery

We look forward to hearing your success stories. Your feedback has allowed us to grow. We are so grateful for our awesome team and our amazing customers. We look forward to further growing your expectations.

How will my product be shipped?

You will receive your product with the GRL™ Insert. The insert's design includes fabric long enough to roll over the sides of the container so that, when the container is removed, the extra fabric serves as additional protection during the shipping process. Due to the fact roots grow through this innovative fabric, the integrity of the root system stays intact.

Does this increase cost?

No. There is no additional cost to the customer. The labor saved by eliminating the netting process, offsets the added cost of the GRL™ Inserts. No netting also means lower lead times for customers' orders being pulled.

Can I plant the Insert?

No. We are currently in research and development on a biodegradable insert. However, at this time, removing the Insert prior to planting is required.

Acer campestre - Hedge Maple					7'wh	6'wh	5'wh	4'wh	3'wh								
Zone (5a)	Height: 30'-35'	Spread: 30'-35'			20.20	18.10	15.20	11.80	8.60								
Hedge maple is a broadly round shaped tree with dense, dark green foliage. Prefers alkaline soil. Has attractive bark, uniform yellow fall color, and is urban tough.																	
Acer x freemanii - Freeman Maple					GRL™ #7	GRL™ Prem	GRL™	1 1/4"	1"br	8'br	6'br	5'br	1"lt	6'lt	8'wh	7'wh	6'wh
'Armstrong'											39.90	35.00		35.00	31.60	28.80	25.30
Zone (4-7)	Height: 50'-70'	Spread: 15'															
A fast growing reliable columnar maple. Makes up quickly with very little production cost. Fall color yellow to orange.																	
Autumn Blaze®					56.80	35.60	29.60	53.60	46.90	44.40	39.90	35.00	39.50	35.00	31.60	28.80	25.30
Zone (3-8)	Height: 50'	Spread: 40'	Royalty: \$1.00	PP4864				UC	UC	UC							
The standard of all Freeman maples, popular because of its rate of growth. Brilliant orange-red color. Dense and healthy branching. Insect and disease resistant with a wide range of adaptability.																	
Autumn Fantasy™									46.90		39.90	35.00	39.50	35.00	31.60	28.80	25.30
Zone (4-8)	Height: 45'	Spread: 40'	Royalty: \$.90														
A reliable Freeman maple with more refined shape than Autumn Blaze® and good dependable crimson-red fall color. Worthy of your consideration.																	
Sienna Glen®								53.60	46.90	44.40	39.90				31.60	28.80	25.30
Zone (3)	Height: 60'	Spread: 40'	Royalty: \$1.00	PP11,322				UC	UC	UC							
Fast growing, hardy with uniform branching, pyramidal form. Tolerant to many types of soil. Colors best from Kentucky north. Hardy and vigorous.																	
Acer griseum - Paperbark Maple					1"br	6'br	5'br	4'br	6'lt	5'lt	4'lt						
Zone (4-8)	Height: 20'-30'	Spread: 15'			58.50	53.60	45.80	39.40	45.00	39.50	35.30						
A regal small tree with upright form. Renowned for its exfoliating mahogany bark. Orange-red fall color. Tolerant of drought and alkaline soil. Slow growing.																	
Acer miyabei - Miyabe Maple					GRL™ #7	1"br	6'br	8'wh	7'wh	6'wh	5'wh						
State Street®					56.80	46.40	40.70	34.00	31.40	28.80	25.80						
Zone (4-7)	Height: 45'	Spread: 35'	Royalty: \$.60			UC	UC										
A dynamite pyramidal maple with attractive corky bark and a dark green foliage. Rich yellow fall color. Adaptable to a range of conditions. No significant pest or disease problems.					New Size	New Size	New Size

Acer platanoides - Norway Maple		1 1/4"	1"br	8'br	6'br	5'br	1"lt	6'lt					
'Crimson King'		46.30	44.20	36.30	33.30	28.80	42.40	36.30					
Zone (4-7)	Height: 40' Spread: 35'												
The king of purple leafed maples. Slow growing, takes 1 or 2 additional years to caliper. Prefers cooler soils, growing better in the North.													
'Royal Red'		46.30	44.20	36.30	33.30	28.80	42.40	36.30					
Zone (3-8)	Height: 40' Spread: 30'												
A nice sized rounded tree with maroon foliage. Similar to 'Crimson' King, but hardier, and perhaps a little more vigorous.													

Acer rubrum - Red Maple		GRL™ #7	GRL™ Prem	GRL™	1 1/4"	1"br	8'br	6'br	1"lt	6'lt	8'wh	7'wh	6'wh	5'wh
'Bowhall'		56.80 New Size										28.70	26.50	23.00
Zone (3-9)	Height: 40' Spread: 15'													
An excellent street tree, 'Bowhall' is considered narrower in width than other red maple cultivars. In summer leaves are dark green. In fall, leaves turn shades of yellow, orange and reddish orange.														
October Glory®		56.80			50.20	44.70	42.30	38.60	42.40	35.00	30.90	28.70	26.50	23.00
Zone (4b-8)	Height: 50' Spread: 35' Royalty: \$.50 PP2116													
A long time favorite best suited for southern climates. One of the best displays of brilliant red fall foliage in the trade. Really striking!														
Red Sunset® 'Franksred'					50.20	44.70	42.30	38.60	42.40	35.00	30.90	28.70	26.50	23.00
Zone (3)	Height: 60' Spread: 45' Royalty: \$1.00													
Upright branching oval-shaped rubrum with brilliant orange to red fall color. A staple in the trade.														
'Sun Valley'											30.90	28.70	26.50	23.00
Zone (4-7)	Height: 40' Spread: 35'													
A newer seedless selection that has performed exceptionally well in the South. Makes up quickly and uniformly. Excellent choice for pot-in-pot.														

Acer saccharum - Sugar Maple		1 1/4"	1"br	8'br	6'br	1"lt	8'lt	6'lt					
Zone (3-8) Height: 70' Spread: 40' 		51.80	45.20	40.60	38.10	40.10	38.00	31.40					
Excellent shade tree with orange, red and scarlet fall color. Native to the Midwest and East Coast. Grows well on the West Coast.													
Fall Fiesta® 'Bailsta'		56.50	51.30	46.30	43.20	44.90	41.80	38.30					
Zone (4-7)	Height: 70' Spread: 50' Royalty: \$1.00 PP11,119												
Fastest growing sugar maple in the trade. Upright rounded growth habit. Green summer foliage turning red to yellow orange in fall. A choice sugar maple!													

Acer tataricum - Tataricum Maple	GRL™ #3 ms	1"br	6'br	5'br
----------------------------------	---------------	------	------	------

Amelanchier laevis - Allegheny Serviceberry

GRL™
Prem

GRL™

'Cumulus'

Zone (4-8) Height: 20'-30' Spread: 15'-20' Royalty: \$.40

Upright-oval form; flowers abundantly in spring with a cloudlike display of delicate white flowers. In fall foliage ranges from golden-orange to russet-red.

40.30

34.30

Lustre®

'Rogers'

Zone (4-8) Height: 20'-30' Spread: 15'-20' Royalty: \$.35

Upright habit; flowers abundantly in spring; leaves emerge purplish, become shiny green in summer and turn to orange and red in the fall

40.30

34.30

Betula jacquemontii - Whitebarked Himalayan Birch

GRL™
5 Stem

Zone (4-7) Height: 40' Spread: 20'

Prized for its distinctive white bark which makes it a welcome addition in winter. Does best in full sun, but will tolerate light shade.

25.80

Betula Hybrids

GRL™
5 Stem

'Royal Frost'

NEW 23-24

Zone (3-6) Height: 30'-40' Spread: 15'-20'

An upright pyramidal birch featuring burgundy-red to purple foliage, showy yellow-orange to red fall color and attractive white bark. It is a cross between Betula populifolia 'Whitespire' (white bark) and Betula 'Crimson Frost' (purple foliage). 'Royal Frost' does best in cool northern climates.

31.80

New Size

Betula nigra - River Birch

GRL™
5 Stem

Zone (3b-9) Height: 45' Spread: 30'

Beautiful multi-colored exfoliating bark. Dark green leaves with gold fall color. Borer resistant. GRL™ are five stem clumps.

25.80

Dura-Heat®

'BNMTF'

Zone (4-9) Height: 40' Spread: 30' Royalty: \$.90

An oval to pyramidal tree with white exfoliating bark. Good tree for hot and humid climates. Clean, shiny leaves. Resistant to aphid and borer. GRL™ are five stem clumps.

25.80

Fox Valley®

'Little King'

Zone (4-9) Height: 8'-10' Spread: 8'-10' Royalty: \$.35

A handsome, dense, compact, multi-stemmed cultivar with an irregular crown. Orangish to brownish bark exfoliates at an early age. Excellent pest and disease resistance, and heat tolerance.

25.80

New Size

Hot Wings®

Autumn Brilliance®

Betula roots

Fox Valley®

Betula nigra - River Birch (continued)

Form

GRL™
5 Stem

Heritage®

'Cully'

25.80

25.80

Zone (4-9) Height: 45' Spread: 35' Royalty: \$.75

Superior form of river birch. Glossy green leaves with creamy orange and white exfoliating bark. Resistant to Bronze Birch Borer. From tissue culture.

Northern Tribute®

'Dickinson (RFM-43)'

25.80

Zone (3-9) Height: 35' Spread: 30' Royalty: \$1.00

Upright rounded habit with ivory bark exfoliating to copper-bronze. Superior adaptability to stresses of the Upper Midwest and Northern Plains. No signs of winter injury or iron chlorosis in alkaline soils. Has performed well in compacted, dry soils, which is extremely atypical of the species.

'Shiloh Splash'

29.90

Zone (3-8) Height: 20'-30' Spread: 10'-15' Royalty: \$1.00 PP16,362

A variegated river birch from our friends at Shiloh Nursery. The leaves are green in the center with an attractive ivory margin.

Betula papyrifera

GRL™
5 Stem

Renaissance Oasis®

'OENCI'

NEW 23-24

31.80

Zone (3-7) Height: 60' Spread: 30'

New Size

Broad, dense, pyramidal form, with drought tolerance. Bark is a rich mahogany-reddish color turning bright white and exfoliates. Leaves are dark green, turning yellow in fall. adaptable a wide range of soil types. A selection from test plots containing hybrids of known bronze birch borer resistant parents.

Betula platyphylla - Japanese White Birch

GRL™

Dakota Pinnacle®

'Fargo'

33.00

Zone (3) Height: 35' Spread: 10' Royalty: \$.75 PP10,963

Columnar to narrowly pyramidal shape with strong central leader. Bark changes color with age. The variety of color and texture adds winter interest.

Betula populifolia - Gray Birch

GRL™
5 Stem

'Whitespire Senior'

31.80

Zone (4) Height: 30'-40' Spread: 25'

Attractive gray-white bark with black markings, doesn't exfoliate; glossy green leaves and lovely fall color, resistance to bronze birch borer; a clonally-propagated version of 'Whitespire' birch

Heritage® GRL™ 5 Stem

Carpinus betulus - European Hornbeam

GRL™
Prem

GRL™

Zone (5-9) Height: 60' Spread: 40'

Densely textured foliage and handsome, slate-gray bark. Dark green leaves turn an attractive yellow in the fall. The bark and buds are ornamental in winter. Dense, tightly branched oval shape.

34.40

28.40

'Fastigiata'

Pyramidal Hornbeam

Zone (4-8) Height: 30'- 40' Spread: 20'-30'

Displays a narrow, fastigate form in youth and, with age, develops a tear drop or oval-vase shape. Dark green foliage turns yellow-orange in fall. Trunks have smooth gray bark and distinctive muscle-like fluting

37.50

31.50

'Frans Fontaine'

Zone (4-8) Height: 30'- 40' Spread: 15'-20'

The most narrow of the Hornbeam species. Very similar in appearances to 'Fastigiata' but maintains its narrow, columnar form in maturity.

37.50

31.50

Carpinus caroliniana

Carpinus caroliniana - American Hornbeam, Blue Beech

GRL™
Prem

GRL™

6'br

5'br

Zone (3-9) Height: 20'- 30' Spread: 20'-30'

Slow growing round shaped tree with outstanding red fall color. Tolerant of high pH soils, shade and drought, but prefers a good soil.

Cercis canadensis - Eastern Redbud

				GRL™ #7	GRL™ Prem	GRL™	1"br	6'br	5'br	5'ms	4'ms	3'ms			
Zone (4-9)	Height: 30'	Spread: 25'		56.80	35.20	29.20	42.30	38.10	33.00	23.90	20.70	17.20			
Small rounded tree with splendid pinkish-purple flowers appearing all over the tree before the leaves emerge. Smooth heart shaped foliage. 															
'Alba'	Whitebud						49.20	40.80	35.30						
Zone (4-9)	Height: 20'-30'	Spread: 25'-30'													
Small globe-shaped tree with showy white flowers in early spring. Green heart-shaped leaves turn yellow in fall. Requires pruning to develop strong structure.															
Flame Thrower®	'NC2016-2'					30.50									
Zone (5-9)	Height: 15'-20'	Spread: 15'	Royalty: \$2.95 PP 31,260												
This impressive redbud boasts perfectly pink flowers and show-stopping foliage that emerges burgundy-red and turns bright yellow and green as it ages. Stunning color display is persistent throughout the season, often showing four to five different shades on a single branch! Developed by the JC Raulston Arboretum at NC State University. 															
'Forest Pansy'	Forest Pansy Redbud				36.50 New Size	30.50 New Size	49.20	40.80	35.30						
Zone (6-9)	Height: 20'	Spread: 15'													
Dignified dark purple foliage. The veins on the back of the leaves are a deep maroon and provide a nice contrast to the light grey-green color on the backs of leaves. The pinkish-purple flowers appear all over in the spring, just before the leaves emerge. Blooms later than species. 															
'Hearts of Gold'					36.50 New Size	30.50 New Size	49.20	40.80	35.30						
Zone (5-9)	Height: 20'-25'	Spread: 25'-35'	Royalty: \$1.65 PP17,740												
Spring starts with tiny lavender-purple redbud blooms. Semi-glossy, heart-shaped leaves emerge with orange-red color before maturing to bright gold. Even in full sun leaves are burn resistant. 															
Luscious Lavender™	'Luclavzam'							40.80	35.30						
Zone (5a)	Height: 25-30'	Spread: 25-30'	Royalty: \$2.50												
A flower show that's brighter and denser than the species. Its open, rounded habit looks great in native gardens, wildlife gardens, as a specimen, or even mass planted. Its thick leathery foliage remains dark and glossy throughout the summer, unbothered by pests or diseases.															
'Merlot'	Cercis can. var. texensis						49.20	40.80	35.30						
Zone (6-8)	Height: 12'	Spread: 15'	Royalty \$2.25 PP22,297												
Being bred from parents canadensis x texensis makes this redbud drought and heat tolerant. It holds a glossy wine-red leaf color through the heat of summer. It has a tighter denser habit than 'Forest Pansy'.															

Cercis canadensis - Eastern Redbud

1"br 6'br 5'br 7'wh 6'wh 5'wh 4'wh

Midnight Express™

'RNI-RCC3'

Zone (5-9) Height: 20'-30' Spread: 10'-20' Royalty: \$2.80

With its velvety, deep burgundy foliage, this redbud beautifies your landscape well beyond bloom time! Enjoy the bright pink, pea-shaped spring blooms of redbud with the bonus of healthy, richly colorful foliage and an appealing rounded shape.

Northern Lites™

'WFHnoli'

Zone (5) Height: 20' Spread: 25' Royalty: \$1.00

Bright hot pink flowers adorn the branches of this very hardy form of redbud. Winters in Ohio have shown the plant to be much hardier than Appalachian Red with the same intensity of color and has withstood temperatures to -29 with no injury to growth or flower buds. Dark green summer foliage turns a warm shade of yellow in autumn. Selected by Ohio plantsman Bill Hendricks of Klyn Nurseries.

'Oklahoma'

Cercis can. var. texensis

Zone (6-9) Height: 12'-18' Spread: 15'-24'

Darker and brighter wine-red buds and flowers with darker green leaves. Typically shrubbier, more compact form than the straight species.

Midnight Express™

Cercis canadensis - Weeping Redbud

GRL™ Prem GRL™ Hvy #1

Golden Falls®

'NC2015-12'

Zone (5-9) Height: 20' Spread: 15' Royalty: \$2.95

The first ever gold-leaved weeping Cercis. Lavender-pink flowers in Spring, followed by large orange-edged leaves that age to a bright golden yellow. The narrow, gracefully weeping form and slow growth rate are perfect for a small-space specimen or for a grouping to create a lovely privacy screen.

Lavender Twist®

'Covey'

Zone (6-9) Height: 20' Spread: 15' Royalty \$1.00 PP10,328

Graceful weeping form. Deep pink flowers emerge before foliage. Very thick dark green leaves. Budded at base. Undercut available at additional cost.

'Ruby Falls'

Zone (5-9) Height: 6' Spread: 4' Royalty \$2.75 PP22,097

An attractive weeping purple leaf redbud, bred from parents 'Covey' x 'Forest Pansy'. Compact form with reddish-purple flowers makes for an elegant landscape addition.

'Vanilla Twist'

Zone (5-9) Height: 12' Spread: 8' Royalty \$1.50 PP22,744

Weeping white flowered Cercis. Hardy hybrid between 'Lavender Twist' and 'Royal White'.

Golden Falls® and Flame Thrower®

Chionanthus retusus - Chinese Fringe TreeGRL™
Prem

Did You Know...

At Robinson Nursery we are passionate about continuous improvement. We are always striving to create the best root systems for our customers.

We grow our seedlings in root-pruning containers from Day 1.

The Air Root-Pruning Step-Up Program promotes fibrous root systems that will help you transplant with ease.

Air Root-Pruning Step-Up Program

From Left to right:

Quercus rubra acorn, Quercus rubra GRL™ Plug, Quercus rubra GRL™ Prem, Quercus rubra # 7 GRL™

Quercus - Oak (continued)

Quercus coccinea

Scarlet Oak

Zone (4-9)

Height: 50'-70'

Spread: 50'

Broad, open form, with good red fall color. Densely foliaged, lots of acorns. For well drained acidic soil. Moderate drought resistance.

Prem

GRL™

35.60

29.60

Quercus ellipsoidalis

Northern Pin Oak

Zone (4-7)

Height: 50'

Spread: 50'

Pyramidal to oval form, red fall color. More tolerant of alkaline soil than Pin Oak. A good urban tree. It will take compacted soils and extended flooding.

29.60

Quercus imbricaria

Shingle Oak or Laurel Oak

Zone (5-8)

Height: 60'

Spread: 70'

Upright oval in youth, becoming rounded and spreading with age. Urban tolerant and adaptable to a wide variety of soils. Shiny dark green foliage.

35.60

29.60

Quercus macrocarpa

Bur Oak

Zone (3-8)

Height: 50'

Spread: 40'

Irregular open form. Dark green foliage with yellow fall color. Corky branch wings. All mature oaks are awe inspiring, but Bur Oak is especially moving.

56.80

35.60

29.60

Quercus macrocarpa on bicolor

Bur Oak

Zone (3-8)

Height: 50'

Spread: 40'

Irregular open form. Dark green foliage with yellow fall color. Corky branch wings. All mature oaks are awe inspiring, but Bur Oak is especially moving.

37.40

31.40

Quercus muhlenbergii

Chinkapin Oak

Zone (4b-7)

Height: 40'-50'

Spread: 50'-60'

A large, broadly rounded oak. Can be used as a street tree as it is urban tolerant, but make sure to provide space for roots and canopy. Prefers moist, well drained soils, but will tolerate dry, alkaline soils as well. Will not become chlorotic in high pH soils.

29.60

Undercut (UC) vs. Non-Undercut

NOTES:

HONEY, WE SHRUNK OUR SHRINK!

Do you know how much your shrink is costing you? No matter how efficiently a company operates, there will always be an element of shrink that occurs in every stage of the supply chain. Every industry has its own unique conditions that generate production-related losses. In the nursery industry, we are faced with many factors that contribute to shrink, including overproduction, pests/diseases, weather conditions, training gaps, lack of standard operating procedure, and never finding that crystal ball we always wanted. You will hear many growers refer to shrink as “dumps”, “culls”, or “scrap”. In Lean Manufacturing, these wastes are known as “defects” and “overproduction”. No matter what you call it, when it comes time to tackle shrink, data is your strongest weapon. In order to bring as many in-demand products to the market as possible, without increasing our production numbers, we needed to deep dive into our defects and production planning process.

In our annual Robinson Nursery Policy Deployment planning session, we recognized

an opportunity to step up how we managed our inventory. We created a 1-year improvement target aimed at developing and utilizing technology that would improve inventory accuracy, track defects, and improve our ability to forecast effectively. In addition to these initial objectives, we have also found ways to increase the quality of our product and streamline interdepartmental communication.

We chose to incorporate a supplemental online database platform that is compatible with our current inventory system. Airtable is a cloud-based program that allows us to build and customize inventory systems that meet the needs of individual departments.

We developed a system that allows our container production department to enter new plantings, track plant movements, and view live inventory from computers, tablets, or phones.

Our propagation department is developing a system that will improve the tracking of their grafting progress, seed handling, planting schedule and final graded

numbers. We built an inventory system for grading bareroot trees that allows grading crews to record defects and include photos of the trees imperfection.

One of the greatest benefits of this new technology is our ability to communicate these defects through all departments. The sooner shrink factors can be identified the sooner they can be stopped, resulting in a smaller loss. We have created cross-departmental teams tasked with finding collaborative ways to combine their skills with our new data and minimize shrink. We were able to finish our 2022-2023 bareroot grading season with a detailed report that can be categorized and analyzed in a variety of ways including by defect, species, sizing, etc.

You can't stop shrink if you don't know where or why it is happening. Track everything. At first, it may seem like an inconvenience or a frustration however, once you identify your percentage of shrink, calculate what it is costing you. We have no doubt, you will find tracking defects to be well worth your time.

ROBINSON NURSERY 1 YEAR IMPROVEMENT TARGETS

- 1.) **Inhouse News**
By July 2022, launch a quarterly newsletter for all-company communication with a focus on employee growth opportunities. Assure delivery is accessible to all team members.
- 2.) **Standard Work**
Train, equip and support department leaders to create standard work through one kaizen event for each department by June, 2023
- 3.) **Field Trips**
Engage staff with 5 tours to customer sites this year. Assure knowledge sharing through a report-out for each.
- 4.) **Supervisor Training**
Define the leadership role of a manager/supervisor. Identify the current gaps and establish a training plan by June, 2023.
- 5.) **Culture**
Bring managers together to define the Robinson Nursery culture and develop a rollout plan by February, 2023.
- 6.) **Safety**
Create a template and develop a safety committee within each department by August 2022 that deploys the Robinson Nursery Safety Program.
- 7.) **Shrink**
By June, 2023, utilize / develop technology to improve inventory accuracy, track defects, and improve our ability to forecast effectively.

DO MORE WITH LESS

Control your nursery or greenhouse business before your business controls you.

THE PETERS COMPANY

“Robinson Nursery is blessed to have worked with The Peters Company over the past several years. We've had great outcomes from both the training and Lean events. They have a true passion for process improvement and the leadership to drive results.”

Chris Robinson, Manager, Robinson Nursery, McMinnville, Oregon

Applying Lean to a pulling process:

- Cut lead time in half
- Smaller crew
- 30% fewer product touches

www.petersco.net

Robinson Nursery is in the 11th year of our Lean management journey and our 3rd year of Policy Deployment. It has been an exciting and rewarding journey that we love sharing with you. If you have been following along with us, thank you! If you are new to our story, welcome!

LEAN MANAGEMENT is an approach to managing an organization that supports the concept of continuous improvement, a long-term approach to work that systematically seeks to achieve small, incremental changes in processes to improve efficiency and quality. Over the years we have seen remarkable improvements in safety, company communication, engagement, efficiency, product quality, huge reductions in waste and more!

POLICY DEPLOYMENT is a method for ensuring that a company's strategic goals drive progress and action at every level within the company. If you have any questions or would like to learn more, please reach out at any time. We are passionate about continuous improvement, and we would love the opportunity to be your partner in growing. If you are interested in starting your own journey into Lean fundamentals we highly recommend Rick and Elizabeth Peters of The Peters Company.

Our Product Line Descriptions

Branched (br) are typically two year top trees that are well branched. These trees are perfect for the container grower that wants quick turns or the field grower that is looking to reduce developmental labor costs.

Clump (cl) A group of plants growing together to form on plant.

Grow Ready Liners™ (GRL™) All our container trees are grown in air root pruning containers. These containers are specifically designed to create a more fibrous root system allowing you to plant difficult to transplant varieties with confidence. Air pruning roots as they grow eliminates circling roots that may cause the tree to girdle later in life. Mulching is used to reduce the need for herbicide which has provided us with accelerated root growth, as well as enhanced tree caliper. Plants are shipped in biodegradable mesh that is easily removed before planting. This process allows us to recycle the plastic containers, helping the environment while reducing shipping charges.

GRL™ A 3 gallon container plant comparable to a 5-6' bareroot whip. The root system on a GRL™ is superior to a bareroot plant. These plants are well rooted and developed in an air root pruning container.

36" gft GRL™ 3 gallon container plant that is Top-Grafted at 36".

GRL™ #3 ms 3 gallon multi-stem container plant.

GRL™ 5 Stem 3 gallon container plant made up of 5 evenly spaced plants in a single container to create a single plant.

GRL™ Shrub Form 3 gallon container shrub.

GRL™ Tree Form 3 gallon container plant. The term "Tree Form" identifies a plant that is typically a shrub but we have made a tree.

GRL™ Prem is our "premium" 3 gallon container plant comparable to a 5-6' branched tree. These have the same great root system as the original GRL™ but are typically a year older. This is one of the best valued products in our line.

#7 GRL™ Comparable to a 6' branched to 1" branched tree. They have a 7 gallon root system that has been air pruned allowing larger, more difficult varieties to transplant with ease and hit the ground growing. #7 GRL™ typically grow more quickly than a bareroot of the same size making them the best option for quick turn container shift ups.

GRL™ #7 ms A 7 gallon multi-stem container plant.

Light Branched (lt) Similar to branched trees, except they have less or shorter branches. These plants will take more time to develop the heads but are an economical choice for the grower that has time to develop the canopy and growers looking for larger caliper plants to line out.

Undercut (uc) are trees root pruned in our fields with special equipment. An undercut tree can be root pruned 1 or sometimes 2 times. Trees are undercut to control sizing to customer specification. The process of undercutting also increases the transplant ability by creating a more fibrous and compact root system.

Weeping Trees have pendulous branches and are graded differently than our typical bareroot plants. They are graded by *Heavy (Hvy)*, #1, and #1 *light* (#1 lt).

Heavy (hvy) and **#1** are ideal for planting into containers or for the field grower looking for a more developed head. The primary difference between heavys and #1 are the caliper.

#1 light (#1 lt) is a good value to a field grower that has time to develop the head and caliper.

Whips (wh) are typically one year top trees. Dependant on the variety, these trees will range from light or minimal branching to no branching at all.

Frequently Asked Questions

How long have you been in business?

Robinson Nursery was founded by Rick and Roxanne Robinson, part time, in 1984 and began operating full time in the early 1990's.

What is the Robinson Nursery succession plan?

Brothers, Chris Robinson and Josh Robinson, have begun to take over ownership of the company and will continue to do so over the next several years.

What are your primary products?

97% of our nursery stock is ornamental and shade trees, 3% are shrubs; of those plants: 30% are bareroot and 70% are container plants.

We are happy to answer any question you might have!

Please contact your local sales professional or call us!

Office: 503.835.4533

Toll Free: 877.855.8733

How many acres are in production?

650 acres. 300 acres are nursery stock; 25 of those acres are greenhouses. The additional 325 acres are vegetable crops for seed, corn and wheat.

Who are your customers?

We sell to the contiguous United States and Canada. The majority of our customers are located in the eastern half of the United States. We sell to B and B growers, container growers, re-wholesalers, online retailers, and garden centers. Our customers field plant Robinson Nursery liners as well as pot the liners into containers.

How do I tell what is a container liner in the catalog or availability?

In our catalog, varieties that offer GRL™ sizes display the GRL™ logo in the plant description. The specific GRL™ sizes offered are labeled as GRL™ in the size column. If GRL™ it is not specified in the size name, it is a bareroot plant. Much like the catalog, our availability distinguishes GRL™ from bareroot by having a GRL™ in its size name.

How do you ship your product?

We use trucking brokers nationwide to find the best, most affordable, refrigerated trucks and rail cars. We have a minimum order of \$5,000 to make these logistics possible.

Where do you source your plant material from?

Our in house propagation department propagates 95% of what we plant. The other 5% of plant material comes from trusted local suppliers.

Bareroot Nursery Stock Handling Guide

PLANTING DEPTH

Planting depth is a hot topic among arborists these days, because many trees fail when planted too deep. A tree's planting depth is critical to its growth and success. Once a tree has been planted and settled in, the main anchoring roots should only be 2 or 3 inches below the soil level. While it is better to plant a tree too high than too low, roots exposed to the sun will sun-scald.

SWEATING NURSERY STOCK

Sweating is a process used to force bud break and activate growth in dormant nursery stock. The goal is to rehydrate plants by increasing temperature and humidity surrounding the dormant tree. A temperature of 50 to 60° F is optimum. We suggest sweating the following genera: **Carpinus caroliniana, Crataegus, Celtis, Quercus, Nyssa and Styrax.** Some suggest that this process also be used on **Acer, Amelanchier, Betula, Fraxinus, Gleditsia, Liquidambar, Malus, Ostya, Pyrus, Stewartia, Syringa and Tilia.** If you have had trouble with any of these trees in the past, this simple step may save you headaches.

The process is fairly easy. It is best done out of direct sunlight so that excessive temperatures do not build up. Place a layer of moistened burlap, straw, or sawdust on the ground. Soak the tree roots in water. Shake off excess moisture and lay the trees down on the moist media. You may wish to spray the trees with a mold inhibiting fungicide to be on the safe side. Cover the trees with another layer of moist media. Finally, cover everything with a tarp or piece of plastic and seal the edges. Check the trees daily for swelling buds. You should see results in three to four days. Sweating should not be done until you can plant the tree out, and the threat of cold temperatures has passed. Tender young tissues will be damaged in sudden cold weather.

ROOT PRUNING

Roots are the main storehouse of energy during the dormant season. In the spring, most of the energy used by the tree, in the first six weeks of new growth, comes from this stored energy. We suggest that in preparing your bareroot tree for planting, you remove as little root as possible. Prune any broken roots back to solid wood, and make a fresh tip cut at the end of large roots. The more energy the tree has available, the sooner it will reestablish itself, and the faster it will grow to a sellable size.

Robinson Nursery Directions

Robinson Nursery is located approximately one hour from Portland International Airport.

- Follow I-84 west to Portland
- Take I-5 South to exit 294 Tigard
- Follow 99W southwest for 27 miles to Hwy 18
- Follow Hwy 18 west for 9 miles and take the second McMinnville exit
- Turn left on Hwy 99 and drive for 2 miles
- Turn right on Trestle View Lane

When you are in the Portland area, we encourage you to visit us!
Our hours are 8:00 a.m. to 4:00 p.m. Monday through Friday.

If these hours are inconvenient, please call and we would be happy to arrange a tour that fits your schedule.

Terms and Conditions of Sale

Claims

Claims for any cause must be made in writing within 10 days of receipt of shipment. Any stock rejected must be reported immediately and held for advice from us as to disposition. In no case should stock be returned to us without prior authorization. We will gladly entertain such reports and make satisfactory adjustments when claims are definitely established. We shall in no case be liable for any sum greater than the amount originally received for said nursery stock and will not entertain claims after stock has once been accepted. **Cancellations must be made in writing and received by us prior to December 15th preceding the originally requested shipping date. Orders canceled after December 15th are subject to a 15% restocking charge.**

Credit

All customers must fill out and sign our confidential credit application. This is a standardized form developed by the nursery industry and provides the basic information necessary for the extension of credit.

Grading

Our minimum standards are those adopted by the American Association of Nurserymen. We strive to deliver a superior size product.

Guarantee

We give no warranty, expressed or implied, as to life, description, quality, productiveness, or any other matter of any nursery stock that we sell. It is mutually agreed that our total liability for any error, should stock prove untrue to name as labeled, shall be limited, upon satisfactory proof, of our replacing free or refunding the purchase price.

Inventory

We establish our inventory from field counts in the spring. Eighty percent of total counts are used to establish saleable numbers. Initial sizing is based on an average of past years' growth for each variety. Another count is done in mid-September. Every 10th plant is graded to establish an accurate inventory. Only eighty-five percent of this inventory will be sold until final gradeout.

If changes are necessary, we try to communicate this by mid-October. In order to ensure that repeat customers are taken care of, all of last years order will be held off inventory until August 1st. You will be contacted in early summer to reserve your plants and make any changes. After August 1st, all remaining plants become open inventory and are available on a first come, first serve basis. We believe this policy will allow you to have confidence in receiving the nursery stock you need from Robinson Nursery.

Minimum Order

All plant whips are sold in multiples of 10. Please consider this when ordering. Plants ordered in multiples of 5 will be rounded to the next highest 10. Minimum order for a pool truck is \$5,000.

Orders

Orders are accepted on the condition that they shall be void should injury befall stock from any act of God or any cause beyond our control. All orders are accepted subject to crop conditions or errors in count.

Royalties

Please note, royalty prices printed in this catalog are subject to change.

Shipping

All shipments travel at the risk and expense of the buyer. Cost of boxing or bailing to be added. There will be an additional charge if you want tree wraps or containers left on plants. ***Please note if you arrange your own truck and you send a non refrigerated truck, you will waive your rights to any credits or claims against Robinson Nursery.**

Shipping Hours

Shipping hours are Monday through Friday from 7:30-4:00. Saturday shipments by appointment only.

Terms

***Payment in advance of shipment is required unless credit is established.**

Net is due 30 days from date of invoice for firms with established credit. Satisfactory references are required prior to shipment for those customers unknown to us. Interest will be charged at the rate of 1.5% per month (annual percentage rate of 18%) on all past due accounts. Please note, there will be a 3.2% processing charge added for payments made by credit card.

Discount Schedule

Invoice must be paid within 30 days of receipt of shipment to qualify for discount.

Volume	Discount
\$7,500-\$14,999	5%
\$15,000-\$29,999	10%
\$30,000-\$59,999	15%
\$60,000-\$99,999	20%
\$100,000+	25%
