Acer rubrum 'Bowhall'

Dear Customers and Friends,

We are celebrating a big milestone at Robinson Nursery; this year is our 40th anniversary. Our Mom and Dad, Rick and Roxanne Robinson had the vision for our Nursery at a young age and now here we are, 40 years later still growing beautiful trees. Many of the original team members are still here today. The wisdom and strength they bring to the team is nothing short of incredible.

Josh and I are well under way with the succession of our Nursery. We collectively own a little more than 50%. We are grateful for the foresight and willingness of our parents and for the help transitioning the business. We are thankful for those that have helped make this a thriving business worthy of succession.

A lot has happened in the last 40 years. Did you know we started as a bareroot nursery? Over the years, we added our Grow Ready Liner program, an innovation that has helped bring a wider array of plants to the marketplace. Check out pages 32 and 33 for a brief timeline of other great nursery milestones!

I can confidently say, one of our keys to success is our purpose driven operating approach. At Robinson Nursery, we are "Growing People and Plants to Change the World". One of my favorite team accomplishments this year was the creation of our Supervisor Training Program. The goal of this training is to increase consistency, efficiency, safety, and overall team satisfaction. The team members have really stepped up and taken full advantage of these trainings. This investment has helped equip our team with leadership skills they can use in all aspects of their lives.

We have many new and exciting projects we would love to share with you. If you haven't visited the nursery recently, please come on out and let us show you around. We are so thankful for you, our partners in growing, that have allowed us to be in business for 40 years. Without you, none of this would be possible. Thank you for trusting us with your business and allowing us to grow with you. We look forward to working with you for many years to come. May God continue to bless you, your families, and your businesses,

Chris and The Robinson Family

It is our vision to create a liner that will stand the test of time. Circling and girdling roots are one of the leading causes of plant death in the landscape. We are continually striving for the ultimate root system.

All GRL™ sizes are grown in air root-pruning containers specifically designed to create a more fibrous root system from start to finish.

In our catalog, varieties that offer GRL™ sizes display the GRL™ logo in the plant description. The specific GRL™ sizes offered are labeled as GRL™ in the size column. If GRL™ it is not specified in the size name, it is a bareroot plant. Much like the catalog, our availability distinguishes GRL™ from bareroot by having a GRL™ in its size name.

Please continue reading to learn more about our Grow Ready Liners™ and the Grow Ready Liner™ Insert. Reach out with questions! We would love to hear from you.

Our exclusive line of Grow Ready Liners™ allow you to plant difficult to transplant varieties with confidence.

Hazelnut shell mulch reduces the need for herbicides resulting in accelerated root growth and enhanced tree caliper.

In addition to our industry leading air root pruning containers, we have developed the GRL™ Insert. This is a porous, light weight fabric insert that roots grow through. When the insert is removed prior to planting, it preforms a final prune for you! Allowing the plant to root out and establish more quickly.

The image on the left was grown in an old pruning container. The image on the right is a GRL™ grown with our air root-pruning container and a GRL™ Insert.

Product will be shipped in our new GRL™ Inserts. We recycle our plastic containers and you will save money on shipping charges with light weight transport. Learn more about the exciting benefits of the GRL™ Insert on pg 3.

Grow Ready Liner™ Insert

Bigger. Healthier. Faster.

This porous, light-weight fabric insert delivers our GRL™ product line to the next level. The Grow Ready Liner™ Insert is placed in our air-root-pruning container at planting. Roots can easily grow through this fabric and still be air-root-pruned by the container. Removal of the insert prior to planting provides a fresh prune.

We are eliminating circling roots that may cause the tree to girdle later in life and providing you with a tree that is ready to perform!

There are many additional proven benefits to be found with the GRL™ Insert. A few of our favorite include:

- We are using approximately 40% less water. The new system retains moisture, allowing the plant to grow more consistently since it has the water it needs when it needs it.
- We are experiencing a much more efficient use of fertilizer with significantly less run-off.
- The fabric helps keep the root system warmer in the winter and cooler in the summer. The temperature control is producing excellent new growth in Spring.

Scan the QR Code for a Video Demonstration on Insert Removal.

There will be many more videos in the future so please be sure to subscribe to our YouTube channel,

www.youtube.com/@robinsonnursery

We look forward to hearing your success stories. Your feedback has allowed us to grow. We are so grateful for our awesome team and our amazing customers. We look forward to further growing your expectations.

How will my product be shipped?

You will receive your product with the GRL™ Insert. The insert's design includes fabric long enough to roll over the sides of the container so that, when the container is removed, the extra fabric serves as additional protection during the shipping process. Due to the fact roots grow through this innovative fabric, the integrity of the root system stays intact.

Does this increase cost?

No. There is no additional cost to the customer. The labor saved by eliminating the netting process, offsets the added cost of the GRL™ Inserts. No netting also means lower lead times for customers' orders being pulled.

Can I plant the Insert?

No. We are currently in research and development on a biodegradable insert. However, at this time, removing the Insert prior to planting is required.

Acer x freemanii - Freeman Maple				GRL™ #7	GRL™ Prem	GRL™	1 1/4"	1"br	8'br	6'br	5'br	1"lt	6'lt	8'wh	7'wh	6'wh

43.70 37.70

Betula jacquemontii - Whitebarked Himalayan Birch

GRL™
5 Stem

Zone (4-7) Height: 40' Spread: 20'
Prized for its distinctive white bark which makes it a welcome addition in winter. Does best in full sun, but will tolerate light shade.

28.40

Betula Hybrids

GRL™
5 Stem

Avalanche™ Betula x 'Avalzam' **NEW 24-25**
Zone (4-7) Height: 50' Spread: 30'-40'
Bark starts out tan, takes on pink tones and then turns bright white. Neat emerald green leaves develop golden fall color. Durability that withstands challenging conditions and resists bronze birch borer. Imported from Japan by Ohio's renown Storrs & Harrison Company in the mid-late 1800s.

35.00
New Size

'Royal Frost'
Zone (3-6) Height: 30'-40' Spread: 15'-20'
An upright pyramidal birch featuring burgundy-red to purple foliage, showy yellow-orange to red fall color and attractive white bark. It is a cross between Betula populifolia 'Whitespire' (white bark) and Betula 'Crimson Frost' (purple foliage). 'Royal Frost' does best in cool northern climates.

35.00

Avalanche™

Betula nigra - River Birch

GRL™
5 Stem

Zone (3b-9) Height: 45' Spread: 30' 
Beautiful multi-colored exfoliating bark. Dark green leaves with gold fall color. Borer resistant. GRL™ are five stem clumps.

28.40

Dura-Heat® 'BNMTF'
Zone (4-9) Height: 40' Spread: 30' Royalty: \$.90
An oval to pyramidal tree with white exfoliating bark. Good tree for hot and humid climates. Clean, shiny leaves. Resistant to aphid and borer. GRL™ are five stem clumps.

28.40

Fox Valley® 'Little King'
Zone (4-9) Height: 8'-10' Spread: 8'-10' Royalty: \$.35
A handsome, dense, compact, multi-stemmed cultivar with an irregular crown. Orangish to brownish bark exfoliates at an early age. Excellent pest and disease resistance, and heat tolerance.

Heritage®

'Cully'

28.40

28.40

Zone (4-9) Height: 45' Spread: 35' Royalty: \$.75

Superior form of river birch. Glossy green leaves with creamy orange and white exfoliating bark. Resistant to Bronze Birch Borer. From tissue culture.

Northern Tribute®

'Dickinson (RFM-43)'

28.40

Zone (3-9) Height: 35' Spread: 30' Royalty: \$1.00

Upright rounded habit with ivory bark exfoliating to copper-bronze. Superior adaptability to stresses of the Upper Midwest and Northern Plains. No signs of winter injury or iron chlorosis in alkaline soils. Has performed well in compacted, dry soils, which is extremely atypical of the species.

'Shiloh Splash'

32.90

Zone (3-8) Height: 20'-30' Spread: 10'-15' Royalty: \$1.00 PP16,362

A variegated river birch from our friends at Shiloh Nursery. The leaves are green in the center with an attractive ivory margin.

Betula papyrifera

GRL™
5 Stem

Renaissance Oasis® 'OENCI'

35.00

Zone (3-7) Height: 60' Spread: 30'

Broad, dense, pyramidal form, with drought tolerance. Bark is a rich mahogany-reddish color turning bright white and exfoliates. Leaves are dark green, turning yellow in fall. adaptable a wide range of soil types. A selection from test plots containing hybrids of known bronze birch borer resistant parents.

Betula platyphylla - Japanese White Birch

GRL™

Dakota Pinnacle®

'Fargo'

36.30

Zone (3) Height: 35' Spread: 10' Royalty: \$.75 PP10,963

Columnar to narrowly pyramidal shape with strong central leader. Bark changes color with age. The variety of color and texture adds winter interest.

Betula populifolia - Gray Birch

GRL™
5 Stem

'Whitespire Senior'

35.00

Zone (4) Height: 30'-40' Spread: 25'

Attractive gray-white bark with black markings, doesn't exfoliate; glossy green leaves and lovely fall color, resistance to bronze birch borer; a clonally-propagated version of 'Whitespire' birch

Carpinus betulus - European Hornbeam

GRL™ Prem GRL™

Zone (5-9) Height: 60' Spread: 40'

Densely textured foliage and handsome, slate-gray bark. Dark green leaves turn an attractive yellow in the fall. The bark and buds are ornamental in winter. Dense, tightly branched oval shape.

36.40 30.40

'Fastigiata' **Pyramidal Hornbeam**

Zone (4-8) Height: 30'- 40' Spread: 20'-30'

Displays a narrow, fastigiata form in youth and, with age, develops a tear drop or oval-vase shape. Dark green foliage turns yellow-orange in fall. Trunks have smooth gray bark and distinctive muscle-like fluting.

39.70 33.70

'Frans Fontaine'

Zone (4-8) Height: 30'- 40' Spread: 15'-20'

Very similar in appearances to 'Fastigiata' but maintains its narrow, columnar form in maturity. Drought tolerant once established, adaptable to varied growing conditions and soils.

39.70 33.70

'Lucas' **Columnar Hornbeam** **NEW 24-25**

Zone (4-8) Height: 20'- 30' Spread: 10'-12'

Dense, tightly columnar. Thick, durable leaves turn from golden yellow to brown and provide winter interest by persisting through the winter months. Tolerates high pH and heavy soils

39.70 33.70
New Size New Size

Small rounded tree with splendid pinkish-purple flowers appearing all over the tree before the leaves emerge. Smooth heart shaped foliage.

'Royal White' **Whitebud** **NEW 24-25**

Zone (4-9) Height: 20'-30' Spread: 25'-30' 51.70 46.10 39.90
New Size New Size New Size

'Royal White' is hardy and produces extra large white flowers. A more compact tree than 'Alba'; it blooms earlier and is more floriferous. The pea-like flowers appear on bare branches in March-April before the foliage emerges.

Flame Thrower® **'NC2016-2'**

Zone (5-9) Height: 15'-20' Spread: 15' Royalty: \$2.95 PP 31,260

This impressive redbud boasts perfectly pink flowers and show-stopping foliage that emerges burgundy-red and turns bright yellow and green as it ages. Stunning color display is persistent throughout the season, often showing four to five different shades on a single branch! Developed by the JC Raulston Arboretum at NC State University. 

'Forest Pansy' **Forest Pansy Redbud**

Zone (6-9) Height: 20' Spread: 15' 40.50 34.50 51.70 46.10 39.90

Dignified dark purple foliage. The veins on the back of the leaves are a deep maroon and provide a nice contrast to the light grey-green color on the backs of leaves. The pinkish-purple flowers appear all over in the spring, just before the leaves emerge. Blooms later than species. 

'Hearts of Gold'

Zone (5-9) Height: 20'-25' Spread: 25'-35' Royalty: \$1.65 PP17,740 40.50 34.50 51.70 46.10 39.90

Spring starts with tiny lavender-purple redbud blooms. Semi-glossy, heart-shaped leaves emerge with orange-red color before maturing to bright gold. Even in full sun leaves are burn resistant. 

Luscious Lavender™ **'Luclavzam'**

Zone (5a) Height: 25-30' Spread: 25-30' Royalty: \$2.50 46.10 39.90

A flower show that's brighter and denser than the species. Its open, rounded habit looks great in native gardens, wildlife gardens, as a specimen, or even mass planted. Its thick leathery foliage remains dark and glossy throughout the summer, unbothered by pests or diseases.

'Merlot' **Cercis can. var. texensis**

Zone (6-8) Height: 12' Spread: 15' Royalty \$2.25 PP22,297 51.70 46.10 39.90

Being bred from parents canadensis x texensis makes this redbud drought and heat tolerant. It holds a glossy wine-red leaf color through the heat of summer. It has a tighter denser habit than 'Forest Pansy'.

Cercis canadensis - Eastern Redbud

Midnight Express™

'RNI-RCC3'

Zone (5-9) Height: 20'-30' Spread: 10'-20' Royalty: \$2.80

With its velvety, deep burgundy foliage, this redbud beautifies your landscape well beyond bloom time! Enjoy the bright pink, pea-shaped spring blooms of redbud with the bonus of healthy, richly colorful foliage and an appealing rounded shape.

Northern Lites™

'WFHnoli'

Zone (5) Height: 20' Spread: 25' Royalty: \$1.00

Bright hot pink flowers adorn the branches of this very hardy form of redbud. Winters in Ohio have shown the plant to be much hardier than Appalachian Red with the same intensity of color and has withstood temperatures to -29 with no injury to growth or flower buds. Dark green summer foliage turns a warm shade of yellow in autumn. Selected by Ohio plantsman Bill Hendricks of Klyn Nurseries.

'Oklahoma'

Cercis can. var. texensis

Zone (6-9) Height: 12'-18' Spread: 15'-24'

Darker and brighter wine-red buds and flowers with darker green leaves. Typically shrubbier, more compact form than the straight species.

Little Lime®	'Jane'				35.40	35.40
Zone (3-8)	Height: 3'-5'	Spread: 3'-5'	Royalty \$1.25	PP22,330		
Dwarf form of Limelight. In summer, lime green blooms open on strong stems. As it ages, rich pink coloring emerges through the fall. This reliable performer blooms on new wood, so a quick trim in late winter or early spring will encourage fresh growth and an abundance of buds.						
						
Little Lime Punch®	'SMNHPH'			NEW 24-25	39.90	39.90
Zone (3-8)	Height: 3'-5'	Spread: 3'-5'	Royalty \$1.25	PP 33,207	New Size	New Size
Blooms emerge lime green, change progressively from the bottom up in a gorgeous array of white, light pink, and rich Hawaiian Punch red. Fantastic color show. Same useful, petite habit as Little Lime.- Impactful fall color.						
						
Little Quick Fire®	'SMHPLQF'				39.90	39.90
Zone (3-8)	Height: 3'-5'	Spread: 3'-5'	Royalty \$1.25	PP25,136		
Like Quick Fire, it is early blooming, flowering about a month before other hydrangeas. White flowers transform as summer progresses to pink, turning a dark rosy pink in the fall. The flower color is not affected by soil pH. Quick and easy to grow.						
						
Pinky Winky Prime®	'ILVOHPPRM'			Available 25-26		
Zone (3-8)	Height: 6'-9'	Spread: 6'-9'	Royalty \$1.25	PP35,334		
Truly massive blooms on a big, hearty habit. Adaptable to many soils, moderate moisture required. Blooms summer/fall regardless of climate, soil, pH or pruning. Prefers good, loamy soil. Salt tolerant. Fall interest.						
						
'Phantom'					35.40	35.40
Zone (3-8)	Height: 10'	Spread: 8'				
Enormous blooms over 8" long, blooms creamy white eventually giving way to pink before they fall. Very sturdy stems and will not weep under the weight of the large flowers. A spectacular paniculata for tree form.						
						
Quick Fire®	'Bulk'				39.90	39.90
Zone (3-8)	Height: 6'-8'	Spread: 6'-8'	Royalty \$1.25	PP16,812		
All the features of Quick Fire® but adds big, full, showy mophead blooms to the mix. Unique X-shaped flowers go from white to pink to bright pink to deep red through the season. Strong, sturdy stems keep blooms clean, upright, and showy all year round Quick and easy to grow.						
						
Quick Fire Fab®	'SMNHPM'				39.90	39.90
Zone (3-8)	Height: 6'-8'	Spread: 5'-6'	Royalty \$1.25	PP32,513		
Blooms about a month before other Hydrangea pan. Flowers are pink, turning a dark, rosy pink in the fall. The flower color is not affected by soil pH. Flowers on new wood. Quick and easy to grow.						
						
Vanilla Strawberry™	'Rehny' First Editions®				35.40	35.40
Zone (4-6)	Height: 6'-8'	Spread: 4'-6'	Royalty: \$1.25	PP20,670		
The flowers begin creamy white midsummer, turn pink and then strawberry red later in the season. Since new flower heads continue to open into late summer, plants may display all three color stages at any one time. Blooms are borne on red stems, making quite a contrast against the green leaves.						
						

A greenhouse filled with Little Lime® Hydrangea. These beauties will be finished into trees.

42.10 38.00 30.70

Zone (4-8) Height: 8' Width: 8' Royalty: \$2.50

Dwarf tree with compact, rounded head and green foliage. Spring bloomer, a single pink bud opening to a white flower. Grafted on 42" standard.

Sargent Tina**M. sargentii 'Tina'**

42.10 38.00 30.70

Zone (4) Height: 5'-7' Width: 12'

Dwarf, spreading ornamental apple grafted on 42" standard. Bright red buds open to white flowers and red fruit. Very disease resistant. Grafted on 42" standard.

'Weeping Tina'

42.10 38.00 30.70

Zone (4) Height: 6' Width: 8'

Light pink to white. Small red fruit. No scab, no rust. True weeping habit, forms into a bell shape. Grafted on 42" standard.

Metasequoia glyptostroboides - Dawn Redwood

GRL™ Prem GRL™

Zone (5a-8b) Height: 70'-90' Spread: 20'-30'

Deciduous conifer with soft fernlike green needles, yellow orange in fall. Upright pyramidal form; droopy branches. Prefers moist, well drained acidic soil. Reddish brown bark.

**Amber Glow™****'WAH-08AG'**

40.20 34.20

Zone (6) Height: 30' Spread: 20' Royalty: \$1.80

A dense, pyramidal habit and mature to a more compact size than other gold foliage varieties. Bright golden foliage in the spring, gains an attractive orange color in the fall. The golden foliage holds up well in the heat and doesn't burn in full sun.

Nyssa sylvatica - Blackgum

GRL™
Prem

GRL™

Zone (4-9) Height: 30'-50' Spread: 20'-30'  

Pyramidal when young, dense horizontal branching. Lustrous green leaves become yellow/orange/scarlet in fall. Extremely fragrant flowers. Water lover but drought tolerant.

40.10

34.10

Forest Fire™**'The James'**

Zone (4-5) Height: 50' Spread: 25' Royalty: \$1.50 PP29473 

A vigorous selection of native Black Gum that boasts an excellent branching habit when young, creating an early attractive silhouette. Glossy, medium green foliage explodes into fiery red in the fall.

44.20

38.20

Green Gable™**'NSUHH'**

Zone (4-9) Height: 50' Spread: 25' Royalty: \$1.85 PP22,951 

Upright, pyramidal shape, that is unusual for Nyssa with uniform branching. Shiny green foliage. Classic eye catching brilliant red fall color.

44.20

38.20

'Majestic'**'M.O.N. No. 2'**

Zone (3-9) Height: 40' Spread: 20' Royalty: \$1.00 

Upright Vase shape with dark, glossy, green foliage. An improved ornamental variety of an often underrated landscape tree. White flowers in the spring, excellent red-orange fall color, a nice specimen tree.

44.20

38.20

Northern Splendor™

Zone (4-9) Height: 40'-50' Spread: 20'-30' Royalty: \$1.00 

One of our favorite Nyssa's out of Twin Lakes Nursery in Grand Rapids MI. Northern selection, with a deep dark green glossy leaf that turns to fire engine red in the fall. Broadly upright branching, goes dormant weeks earlier than other Nyssa.

44.20

38.20

Tupelo Tower®

Zone (4-9) Height: 30'-40' Spread: 20' Royalty: \$1.00 

Unique upright tree with strong vertical habit. Dark green leaves in summer; gold and orange in fall. Birds enjoy the small blue fruit. Useful as a street tree or upright specimen. Introduced by Klyn Nursery, Perry Ohio.

44.20

38.20

'Wildfire'

Zone (4-9) Height: 40'-50' Spread: 20' 

This is an upright form with a strong central leader and bright red new growth. Bright red fall color. We are really excited about this one.

44.20

38.20

Ostrya virginiana - Hophornbeam

GRL™
Prem

GRL™

Zone (3-9) Height: 30' Spread: 20' 

Very graceful small tree with horizontal branching. No disease or insect problems. Drought tolerant and very hardy.

41.70

35.70

Parrotia persica - Persian Ironwood				GRL™ Prem	GRL™										
Zone (5-8)	Height: 20'	Spread: 20'		37.40	31.40										
Round to vase shape, slow growing, drought tolerant, glossy leaves outrageous red, yellow and orange fall color. Everyone should have one!															
Persian Spire™	'JLColumnar'			41.10	35.10										
Zone (5-8)	Height: 25'	Spread: 10'	Royalty: \$.85 PP 24951												
A colorful upright specimen with an oval habit. . Refined foliage emerges purple and matures to green with purple margins. Fall color is orange, red, yellow and burgundy. It is bright and long lasting.															
'Vanessa'				41.10	35.10										
Zone (5-8)	Height: 25'-30'	Spread: 10'													
Very upright tree, new growth has bronze red color, leaves turn green, purple, then scarlet orange in fall.

Tilia cordata - Little Leaf Linden				1 1/4"	1"br	6"br	5"br	8'wh	7'wh	6'wh	5'wh	4'wh			
Greenspire®				52.00	45.70	40.80	31.90	33.50	30.10	27.30	23.80	18.20			
Zone (3-8)	Height: 40'	Spread: 30'	Royalty: \$.50	UC	UC	UC	UC								
Most popular of the cordatas. Symmetrical pyramidal form that is easily maintained. Tolerant of harsh urban conditions. Fragrant bloom and yellow fall color.															

Tilia mongolica - Mongolian Linden				1"br	6'br	5'br	6'wh	5'wh	4'wh								
Harvest Gold®				45.70	40.80	31.90	27.30	23.80	18.20								
Zone (3)	Height: 30'-40'	Spread: 20'	Royalty: \$0.75 PP12232	UC	UC	UC											
An excellent, hardy and adaptable shade tree with fragrant yellow flowers with showy red petioles in early summer. Interesting lobed toothed leaves, unusual for a linden, which turn a stunning gold in fall. Features improved cold hardiness and resistance to sun scald.				New Size	New Size	New Size											
Tilia tomentosa - Silver Linden				1"br	6'br	5'br	8'wh	7'wh	6'wh	5'wh							
Sterling®				45.70	40.80	31.90	32.50	29.20	26.50	23.10							
Zone (4-7)	Height: 50'	Spread: 30'	Royalty: \$.90	UC	UC	UC											
Broadly pyramidal. Dark green foliage with silvery underside. Fragrant blooms in summer. Resistant to Japanese Beetles.				New Size	New Size	New Size											
Ulmus americana - American Elm				GRL™ #7	GRL™ Prem	GRL™											
'Jefferson'		Ulmus americana				30.10											
Zone (4-7)	Height: 70'	Spread: 50'															
An American Elm that is highly resistant to DED. It is distinguished by its low spreading form with arching limbs and broad U-shaped branch unions.																	
'New Harmony'		Ulmus americana				30.10											
Zone (4-9)	Height: 70'	Spread: 70'															
A U.S. National Arboretum intro. This variety was selected for its tolerance to DED. Rapid growth once established. Broadly vase-shaped canopy. Tough urban tree.																	
'Princeton'		Ulmus americana		59.60	36.10	30.10											
Zone (3a-9)	Height: 75'-90'	Spread: 50'-60'															
Very disease resistant American Elm, some nearly 100 years old in New Jersey. Fast grower with vase shape crown, very large, stately tree; give room to grow.																	
'Valley Forge'		Ulmus americana			36.10	30.10											
Zone (2-9)	Height: to 90'	Spread: 50'-70'															
Disease resistant American Elm with a classic upright arching form. Extremely vigorous; long lived (300 years). The 'best' tree for urban conditions.																	
Ulmus parvifolia and Hybrids				GRL™ #7	GRL™ Prem	GRL™											
Allee®		U. parvifolia 'Emer II'		59.60	36.10	30.10											
Zone (4-9)	Height: 70'	Spread: 50'	Royalty: \$1.20 PP7552														
Upright vase shaped shade tree, yellow fall color. Resistant to disease. Gray, green, orange-brown exfoliating bark. Excellent resistance to the common pests and diseases of elm trees. Best in the South. A Dirr selection.																	

Ulmus parvifolia and Hybrids

			GRL™ #7	GRL™ Prem	GRL™
'Frontier'	U. parvifolia x U. carpinifolia		59.60	36.10	30.10
Zone (4-10)	Height: 30'	Spread: 20'			
Fast growing, moderate sized tree. Great to plant under power lines and in smaller landscapes. Resistant to DED, beetles and drought. Red-purple fall color.					
					

'Frontier'

Ulmus - Complex Hybrids

			GRL™ #7	GRL™ Prem	GRL™
Accolade™	U. japonica x wilsoniana 'Morton'		59.60	36.10	30.10
Zone (4-9)	Height: 60'	Spread: 40' Royalty: \$.75			
Vigorous grower; graceful, vase-shaped with excellent resistance to disease, pest and drought. Glossy dark green leaves and rich yellow fall color.					
					
Choice City™	U. davidiana var. japonica				30.10
Zone (5)	Height: 35'-45'	Spread: 35'-45' Royalty: \$1.50			
A small Asiatic elm that is resistant to both Dutch Elm Disease, European Elm Scale and Elm Yellows. Tolerant of urban conditions and disturbed sites. selected for its strong structure					
					
New Horizon®	U. pumila x japonica			36.10	30.10
Zone (3-7)	Height: 80'	Spread: 45'			
Upright vase-shaped shade tree. Dark green summer foliage turns yellow in fall, then red.					
					
Northern Empress®	U. davidiana var. japonica	NEW 24-25		36.10	30.10
Zone (3-6)	Height: 28'	Spread: 24' Royalty:		New Size	New Size
A very hardy small to medium sized growing elm with a rounded crown, open branching, and attractive summer and fall foliage. Fall foliage changes from green to apricot-orange to burgundy-red before leaf drop.					
					
Triumph™	'Morton Glossy'			36.10	30.10
Zone (4)	Height: 50'	Spread: 50' Royalty: \$.60			
Upright tree with strong branching. Very vigorous resistance to disease, Elm Leaf Beetle and Japanese Beetle.					
					

CELEBRATING 40 YEARS!

We are so grateful for so many things. It is such a blessing to be a part of an industry that is beautiful, neighborly, resilient, constantly adapting and making the world a better place.

We thank you for being a part of our story. We want to come along side you, as your partner in growing, and help to build your story.

1984

Rick and Roxanne Robinson planted their first trees in the hills of Dundee, Oregon under the name Red Hills Nursery. Bareroot maples, crabapples, and fruit trees were the first crops harvested.

1990

The Robinsons began purchasing the neighboring 129 acres, located between Amity & McMinnville, Oregon. This is the main farm where Robison Nursery is located today.

1988

2009

Anything worth doing is worth doing right. Began using air root pruning containers.

Looking for additional improvements we began netting our Grow Ready Liners™ lightning shipping loads and costs.

2012

2007

Adjustments made year after year set apart our container products from the rest of the pack. Devoting our energies to making the best container plant possible, the Grow Ready Liner™ was born.

2010

We began implementing LEAN; a systematic, long-term approach to achieve small incremental changes to continuously improve efficiency and quality.

No longer residing in the Red Hills, the nursery name was changed to Robinson Nursery

1993

The new cold storage facility was built allowing us to triple the amount of product kept in dormancy.

2000

At the behest of our customers, we established a 1 acre container yard and began learning how to grow container trees.

2006

1992

Rick and Roxanne quit their day jobs to pursue Robinson Nursery full time.

1997

Robinson Nursery became an incorporated entity.

2004

The first greenhouse was built. We now have over 150 greenhouses.

Robinson Nursery, Inc. was featured on the cover of Nursery Management Magazine.

2014

Brothers, Chris and Josh Robinson, began to purchase Robinson Nursery from their parents, Rick and Roxanne

2020

Midnight Express™ and Starway to Heaven™ Partnered with Proven Winners to introduce some of our plant genetics.

2024

2013

Mechanized the potting line allowing us to mix our own soil and triple our daily output of planted product.

2016

Policy Deployment launched, ensuring our companies strategic goals drive progress and action at every level of Robinson.

2022

300 acres of nursery stock.
25 acres of green houses.
&
Growing People and Plants to Change the World.

Our Product Line Descriptions

Branched (br) are typically two year top trees that are well branched. These trees are perfect for the container grower that wants quick turns or the field grower that is looking to reduce developmental labor costs.

Clump (cl) A group of plants growing together to form on plant.

Grow Ready Liners™ (GRL™) All our container trees are grown in air root pruning containers. These containers are specifically designed to create a more fibrous root system allowing you to plant difficult to transplant varieties with confidence. Air pruning roots as they grow eliminates circling roots that may cause the tree to girdle later in life. Mulching is used to reduce the need for herbicide which has provided us with accelerated root growth, as well as enhanced tree caliper. Plants are shipped in biodegradable mesh that is easily removed before planting. This process allows us to recycle the plastic containers, helping the environment while reducing shipping charges.

GRL™ A 3 gallon container plant comparable to a 5-6' bareroot whip. The root system on a GRL™ is superior to a bareroot plant. These plants are well rooted and developed in an air root pruning container.

36" gft GRL™ 3 gallon container plant that is Top-Grafted at 36".

GRL™ #3 ms 3 gallon multi-stem container plant.

GRL™ 5 Stem 3 gallon container plant made up of 5 evenly spaced plants in a single container to create a single plant.

GRL™ Shrub Form 3 gallon container shrub.

GRL™ Tree Form 3 gallon container plant. The term "Tree Form" identifies a plant that is typically a shrub but we have made a tree.

GRL™ Prem is our "premium" 3 gallon container plant comparable to a 5-6' branched tree. These have the same great root system as the original GRL™ but are typically a year older. This is one of the best valued products in our line.

#7 GRL™ Comparable to a 6' branched to 1" branched tree. They have a 7 gallon root system that has been air pruned allowing larger, more difficult varieties to transplant with ease and hit the ground growing. #7 GRL™ typically grow more quickly than a bareroot of the same size making them the best option for quick turn container shift ups.

GRL™ #7 ms A 7 gallon multi-stem container plant.

Light Branched (lt) Similar to branched trees, except they have less or shorter branches. These plants will take more time to develop the heads but are an economical choice for the grower that has time to develop the canopy and growers looking for larger caliper plants to line out.

Undercut (uc) are trees root pruned in our fields with special equipment. An undercut tree can be root pruned 1 or sometimes 2 times. Trees are undercut to control sizing to customer specification. The process of undercutting also increases the transplant ability by creating a more fibrous and compact root system.

Weeping Trees have pendulous branches and are graded differently than our typical bareroot plants. They are graded by *Heavy (Hvy)*, #1, and #1 light (#1 lt).

Heavy (hvy) and #1 are ideal for planting into containers or for the field grower looking for a more developed head. The primary difference between heavys and #1 are the caliper.

#1 light (#1 lt) is a good value to a field grower that has time to develop the head and caliper.

Whips (wh) are typically one year top trees. Dependant on the variety, these trees will range from light or minimal branching to no branching at all.

Frequently Asked Questions

How long have you been in business?

Robinson Nursery was founded by Rick and Roxanne Robinson, part time, in 1984 and began operating full time in the early 1990's.

What is the Robinson Nursery succession plan?

Brothers, Chris Robinson and Josh Robinson, have begun to take over ownership of the company and will continue to do so over the next several years.

What are your primary products?

97% of our nursery stock is ornamental and shade trees, 3% are shrubs; of those plants: 30% are bareroot and 70% are container plants.

We are happy to answer any question you might have!

Please contact your local sales professional or call us!

Office: 503.835.4533

Toll Free: 877.855.8733

How many acres are in production?

650 acres. 300 acres are nursery stock; 25 of those acres are greenhouses. The additional 325 acres are vegetable crops for seed, corn and wheat.

Who are your customers?

We sell to the contiguous United States and Canada. The majority of our customers are located in the eastern half of the United States. We sell to B and B growers, container growers, re-wholesalers, online retailers, and garden centers. Our customers field plant Robinson Nursery liners as well as pot the liners into containers.

How do I tell what is a container liner in the catalog or availability?

In our catalog, varieties that offer GRL™ sizes display the GRL™ logo in the plant description. The specific GRL™ sizes offered are labeled as GRL™ in the size column. If GRL™ it is not specified in the size name, it is a bareroot plant. Much like the catalog, our availability distinguishes GRL™ from bareroot by having a GRL™ in its size name.

How do you ship your product?

We use trucking brokers nationwide to find the best, most affordable, refrigerated trucks and rail cars. We have a minimum order of \$5,000 to make these logistics possible.

Where do you source your plant material from?

Our in house propagation department propagates 95% of what we plant. The other 5% of plant material comes from trusted local suppliers.

Bareroot Nursery Stock Handling Guide

PLANTING DEPTH

Planting depth is a hot topic among arborists these days, because many trees fail when planted too deep. A tree's planting depth is critical to its growth and success. Once a tree has been planted and settled in, the main anchoring roots should only be 2 or 3 inches below the soil level. While it is better to plant a tree too high than too low, roots exposed to the sun will sun-scald.

SWEATING NURSERY STOCK

Sweating is a process used to force bud break and activate growth in dormant nursery stock. The goal is to rehydrate plants by increasing temperature and humidity surrounding the dormant tree. A temperature of 50 to 60° F is optimum. We suggest sweating the following genera: **Carpinus caroliniana, Crataegus, Celtis, Quercus, Nyssa and Styrax.** Some suggest that this process also be used on **Acer, Amelanchier, Betula, Fraxinus, Gleditsia, Liquidambar, Malus, Ostyra, Pyrus, Stewartia, Syringa and Tilia.** If you have had trouble with any of these trees in the past, this simple step may save you headaches.

The process is fairly easy. It is best done out of direct sunlight so that excessive temperatures do not build up. Place a layer of moistened burlap, straw, or sawdust on the ground. Soak the tree roots in water. Shake off excess moisture and lay the trees down on the moist media. You may wish to spray the trees with a mold inhibiting fungicide to be on the safe side. Cover the trees with another layer of moist media. Finally, cover everything with a tarp or piece of plastic and seal the edges. Check the trees daily for swelling buds. You should see results in three to four days. Sweating should not be done until you can plant the tree out, and the threat of cold temperatures has passed. Tender young tissues will be damaged in sudden cold weather.

ROOT PRUNING

Roots are the main storehouse of energy during the dormant season. In the spring, most of the energy used by the tree, in the first six weeks of new growth, comes from this stored energy. We suggest that in preparing your bareroot tree for planting, you remove as little root as possible. Prune any broken roots back to solid wood, and make a fresh tip cut at the end of large roots. The more energy the tree has available, the sooner it will reestablish itself, and the faster it will grow to a sellable size.

Robinson Nursery Directions

Robinson Nursery is located approximately one hour from Portland International Airport.

- Follow I-84 west to Portland
- Take I-5 South to exit 294 Tigard
- Follow 99W southwest for 27 miles to Hwy 18
- Follow Hwy 18 west for 9 miles and take the second McMinnville exit
- Turn left on Hwy 99 and drive for 2 miles
- Turn right on Trestle View Lane

When you are in the Portland area, we encourage you to visit us!
Our hours are 8:00 a.m. to 4:00 p.m. Monday through Friday.

If these hours are inconvenient, please call and we would be happy to arrange a tour that fits your schedule.

Terms and Conditions of Sale

Claims

Claims for any cause must be made in writing within 10 days of receipt of shipment. Any stock rejected must be reported immediately and held for advice from us as to disposition. In no case should stock be returned to us without prior authorization. We will gladly entertain such reports and make satisfactory adjustments when claims are definitely established. We shall in no case be liable for any sum greater than the amount originally received for said nursery stock and will not entertain claims after stock has once been accepted. **Cancellations must be made in writing and received by us prior to December 15th preceding the originally requested shipping date. Orders canceled after December 15th are subject to a 15% restocking charge.**

Credit

All customers must fill out and sign our confidential credit application. This is a standardized form developed by the nursery industry and provides the basic information necessary for the extension of credit.

Grading

Our minimum standards are those adopted by the American Association of Nurserymen. We strive to deliver a superior size product.

Guarantee

We give no warranty, expressed or implied, as to life, description, quality, productiveness, or any other matter of any nursery stock that we sell. It is mutually agreed that our total liability for any error, should stock prove untrue to name as labeled, shall be limited, upon satisfactory proof, of our replacing free or refunding the purchase price.

Inventory

We establish our inventory from field counts in the spring. Eighty percent of total counts are used to establish saleable numbers. Initial sizing is based on an average of past years' growth for each variety. Another count is done in mid-September. Every 10th plant is graded to establish an accurate inventory. Only eighty-five percent of this inventory will be sold until final gradeout.

If changes are necessary, we try to communicate this by mid-October. In order to ensure that repeat customers are taken care of, all of last years order will be held off inventory until August 1st. You will be contacted in early summer to reserve your plants and make any changes. After August 1st, all remaining plants become open inventory and are available on a first come, first serve basis. We believe this policy will allow you to have confidence in receiving the nursery stock you need from Robinson Nursery.

Minimum Order

All plant whips are sold in multiples of 10. Please consider this when ordering. Plants ordered in multiples of 5 will be rounded to the next highest 10. Minimum order for a pool truck is \$5,000.

Orders

Orders are accepted on the condition that they shall be void should injury befall stock from any act of God or any cause beyond our control. All orders are accepted subject to crop conditions or errors in count.

Royalties

Please note, royalty prices printed in this catalog are subject to change.

Shipping

All shipments travel at the risk and expense of the buyer. Cost of boxing or bailing to be added. There will be an additional charge if you want tree wraps or containers left on plants. ***Please note if you arrange your own truck and you send a non refrigerated truck, you will waive your rights to any credits or claims against Robinson Nursery.**

Shipping Hours

Shipping hours are Monday through Friday from 7:30-4:00. Saturday shipments by appointment only.

Terms

***Payment in advance of shipment is required unless credit is established.**

Net is due 30 days from date of invoice for firms with established credit. Satisfactory references are required prior to shipment for those customers unknown to us. Interest will be charged at the rate of 1.5% per month (annual percentage rate of 18%) on all past due accounts. Please note, there will be a 3.2% processing charge added for payments made by credit card.

Discount Schedule

Invoice must be paid within 30 days of receipt of shipment to qualify for discount.

Volume	Discount
\$7,500-\$14,999	5%
\$15,000-\$29,999	10%
\$30,000-\$59,999	15%
\$60,000-\$99,999	20%
\$100,000+	25%
