

Acer x nikoense 'Ginzam'

Gingerbread™ Maple

Zone: 4

Height: 25'-30'

Width: 15'-20'

Crown: Upright Oval
Growth Rate: Vigorous
Soil: Clay, Loam, Sand
pH: Acid
Breakage: Resistant
Pests: Few if any
Disease: Verticillium

This new hybrid of *Acer griseum* and *Acer nikoense* was introduced by Lake County Nursery in Ohio. It's main features are it's vigor compared to *Acer griseum*, it's upright habit, it's fine exfoliating bark and cinnamon bark color, and it's bright orange and red fall color. This plant should see no insect problems, but will probably contract *Verticillium* if it is present in the soil. While it makes a fine tree, the exfoliating bark is the main feature of this plant, and we think a multi-stem tree features this aspect of the plant best.
