

## Acer rubrum 'Autumn Flame'®

## 'Autumn Flame'® Red Maple

Zone: 4-7

Height: 50'

Width: 45'

Crown: Round

Flower: Showy in Spring

Seed: Seedless

Soils: Adaptable except for Alkaline

Root: Surface roots may lift sidewalks

Fall Color: Consistent bright red

Acer Autumn Flame® is an excellent all around shade tree. It has a round canopy but tends to have a central leader, which is rare on a round tree. It is a vigorous grower and resistant to breakage. It will take very wet soils but also is drought tolerant. It does prefer neutral to acid soils and will become chlorotic in alkaline soil. Autumn Flame's autumn color is it's best feature. It colors before other Red Maples, and holds it's red leaves for weeks. Wait a minute, it's best feature is that it's seedless. It will not spread on it's own. Autumn Flame is available in several sizes branched or whip trees.
