

Betula nigra

'Summer Cascade'® River Birch PP 15,105

Zone: 4

Height: As trained

Width: 10'

Form: Weeping
Growth Rate: Fast
Soil: Clay, loam, sand
pH: Acidic
Drainage: Water not a problem
Drought: Moderate resistance
Pests: Resistant to borers

From North Carolina, 'Summer Cascade'® has a habit of arching pendulous branches. It will grow as high as trained, and then gracefully weep to the ground. If untrained, it will make a mound on the ground. Being a *Betula nigra* selection, it has most of the same characteristics of the species. It doesn't mind wet soils, but will take quite a bit of drought. It has excellent resistant to Bronze Birch Borer and Birch Leaf Miner. It prefers acidic soil. It is also hardy with good yellow fall color.

The trunk is peeling like the species.

This is a great weeper for many landscape situations.

Robinson Nursery offers 'Summer Cascade'® as bare root whips.
