

## Cotinus 'Grace'

Zone: 5-9

Height: 5'

Width: 5'

Crown: Round

Growth Rate: Moderate

Soil: Clay, loam, sand

pH: Alkaline, acid

Drainage: Well drained

Drought: High tolerance

Breakage: Resistant

## 'Grace' Purple Smoke Tree

'Grace' is the result of a complex hybrid of three Cotinus species. The most alluring feature of 'Grace' is the large frothy pink bloom against the dark red background foliage in summer. Combine this with its lack of pests or diseases, adaptability to acid or alkaline soil, and its drought tolerance, you've got a winner. Add to that an unusual dark red foliage in summer, and an orange/bronze fall color. 'Grace' can be cut back to the ground each winter to produce a group of upright stems with dark foliage each summer, but there will be no bloom. This plant needs full sun to perform. In sandy soil it may need some summer irrigation. Robinson Nursery offers 'Grace' as a Grow Ready™ liner.
