

## Eucommia ulmoides

## Hardy Rubber Tree

Zone: 4b-7

Height: 40'-60'

Width: 25'-35'

Crown: Round to spreading

Growth Rate: Slow

Soil: Clay, loam, sand

Drainage: Well drained

pH: Acid to very acid

Drought: Extremely tolerant

Pests: Few if any

Disease: Few if any

Avoid: Wet feet

Hardy Rubber Tree has nothing really special about it except that it is an urban tough tree that will have healthy green foliage even in the most challenging of situations. It is extremely drought tolerant. It is adaptable to soils and does well in either acid or alkaline conditions.

It does need good drainage and it is slow grower. There are no colorful aspects to this tree. It's a plain workhorse useful for those sites where nothing else will grow and anything green is appreciated. Robinson Nursery offers Eucommia as bare root whips
