

## Hydrangea paniculata 'Kyushu' - Kyushu Hydrangea

Zone: 4-8

Height: 6'-8'

Width: 6'-7'

Exposure: Full sun or filtered shade  
Crown: Pyramidal  
Growth: Fast  
Soil: Loose, organic rich is best  
pH: Slightly acidic is best  
Drainage: Moist, well drained  
Drought: Will tolerate short periods  
Breakage: Strong  
Pests: Few  
Disease: Few

'Kyushu' has large white flowers against dark green foliage in July and September. Stems are upright and should be pruned back each spring to 2 or 3 buds, before leaves come out.
