

Pyrus calleryana 'Aristocrat'®

'Aristocrat'® Flowering Pear

Zone: 5

Height: 40'

Width: 25'

Crown: Pyramidal

Soil: Loam, sand, clay

Growth Rate: Fast

pH: Acid, alkaline

Drought: High tolerance

Drainage: Well drained, occasionally wet

Breakage: Resistant

'Aristocrat' Pear is a vigorous flowering tree that quickly reaches it's 40' height. The branching is horizontal, so included bark crotches are very unlikely. As with the other cultivars, 'Aristocrat' puts on a glorious display of white flowers in the spring. Leaves are glossy dark green and turn orange to red in the fall. Fruit is very small and attractive to wildlife; not a litter problem. 'Aristocrat' spreads more than other cultivars, so it should be sited with plenty of room. Robinson Nursery offers Pyrus 'Aristocrat' as bare root whips.
