

Pyrus 'Autumn Blaze' - Autumn Blaze Ornamental Pear

Zone: 4-8

Height: 30'-35'

Width: 20'-25'

Exposure: Full sun
Crown: Broadly pyramidal to round
Growth: Fast
Soil: Adaptable
pH: Acid to alkaline
Drainage: Good drainage
Drought: Tolerant once established
Breakage: A little brittle

Autumn Blaze Pear starts of the spring with a sterling show of white flowers. Summer follows with very dark green glossy leaves, which turn an electric scarlet in fall. The fruit is small and not ornamental, and not messy. Tending to be a round tree, the grower will have to be proactive in establishing a central leader. Lateral branches grow horizontally. The canopy is dense and provides cover and food for birds.
