

## **Tilia americana 'Boulevard' - Boulevard American Linden**

Zone: 3-8

Height: 60'

Width: 30'

Exposure: Full sun

Crown: Pyramidal with upright branching

Growth: Fast

Soil: No compacted clay

pH: Neutral to acid

Drainage: Well drained

Drought: Prefers moisture during times of drought

Breakage: Strong

Pests: Aphids, Japanese beetle

'Boulevard' is an upright form of American Linden. It has large dark green leaves and fragrant yellow flowers in spring. It is fast growing and although the branches are upright, they generally do not tend to develop included crotches. Selected by Bailey Nurseries.
