

Ulmus parvifolia 'Everclear' - Everclear Lacebark Elm

Zone: 5-9

Height: 40'

Width: 15'

Exposure: Full sun

Crown: Upright, almost columnar

Growth: Fast

Soil: Does well in a variety of soils

pH: Acid or alkaline

Drainage: Well drained

Drought: Tolerant once established

Pests: Resistant

Disease: Highly resistant

This upright form of Lacebark Elm was developed in Georgia and does very well in their heat and humidity. It is fast growing and develops excellent exfoliating bark: orange, grey, green and tan. The leaves are small with yellow fall color. It is highly resistant to the Elm Leaf Beetle and Dutch Elm Disease. Elms are a good choice for urban situations as well as natural plantings.
