

## Viburnum dentatum 'Synnestvedt' Chicago Lustre® Viburnum

Zone: 5-7

Height: 10'

Width: 10'

Crown: Upright, rounded  
Growth: Moderate  
Soil: Clay, loam, sand  
pH: Acid, some alkaline  
Drainage: Well drained  
Drought: High tolerance  
Breakage: Resistant  
Pests: Few if any  
Disease: Few if any

Chicago Lustre® has glossy deep green foliage on an upright rounded plant. It has masses of creamy white 3" flowers in June followed in autumn by clusters of small blue/black berries. The birds take these away fairly quickly. Fall color is variable, sometimes attractive. Expect this plant to grow to 10' x 10' in 10 years. Wet sites should be avoided but otherwise, Chicago Lustre® is very adaptable. Some sources site Zone 5-8, but Chicagoland Grows Inc. lists Zone 3. Anyway, this is a trouble free large shrub that should grow in most sites. We like it. Robinson Nursery offers Chicago Lustre® in various sizes of bare root shrubs.
