

## Acer saccharum 'Green Mountain'® 'Green Mountain'® Sugar Maple

Zone: 3-8

Height: 50'

Width: 15'

Crown: Oval

Soils: Needs acid soil with good drainage

Salt: Poor resistance

Roots: May lift sidewalks

Acer saccharum 'Green Mountain' has been the most popular Sugar Maple on the market for at least 30 years. It offer a dense canopy of dark green leaves, producing dark shade. The tree is strong, and if trained properly will not succumb to wind or ice. In the fall the leaves give an excellent show of yellow, orange and red leaves all on the same tree. This is also the same tree that maple syrup is collected from. So as long as the soil and full sun conditions are met, this will be a solid performer in landscapes and parks. As always, trees perform much better in areas where they have sufficient room to grow. Robinson Nursery offers Acer saccharum Green Mountain in whips and branched trees.
