

## Acer x nikoense 'Ginzam'

Zone: 4

Height: 25'-30'

Width: 15'-20'

Crown: Upright Oval  
Growth Rate: Vigorous  
Soil: Clay, Loam, Sand  
pH: Acid  
Breakage: Resistant  
Pests: Few if any  
Disease: Verticillium

## Gingerbread™ Maple

This new hybrid of *Acer griseum* and *Acer nikoense* was introduced by Lake County Nursery in Ohio. It's main features are it's vigor compared to *Acer griseum*, it's upright habit, it's fine exfoliating bark and cinnamon bark color, and it's bright orange and red fall color.

This plant should see no insect problems, but will probably contract Verticillium if it is present in the soil.

While it makes a fine tree, the exfoliating bark is the main feature of this plant, and we think a multi-stem tree features this aspect of the plant best.

Robinson Nursery offers this tree as a bare root whip, and soon to be offered as a #3 Grow Ready™ liner.
