

Acer x freemanii 'cv. 'Jeffersred'

Autumn Blaze® Maple

Zone: 4-8

Height: 50'

Width: 40'

Crown: Strongly Upright oval

Growth Rate: Fast

Soil: Adaptable except for alkaline

Site: Takes moist site and is still drought tolerant

Pests: Few

Fall Color: Orange Red

Acer Autumn Blaze originated at Jeffers Nursery in Ohio. It was developed to have the best points of the Red Maple cultivars with the vigor of Silver Maple. The experiment was successful, although we hear grumbles in some areas about fall color. This tree very quickly became the most popular of all the Red Maple varieties. Like it's parents, it has few if any insect pests, and Verticillium is the only real disease problem. Autumn Blaze is grown from cuttings so there is no incompatibility problems. Robinson Nursery has this tree available in whips, branched and multi-stemmed trees.
