

Acer x fremanii cv. 'Celzam'

Celebration® Maple

Zone: 4-7

Height: 45'

Width: 30'

Crown: Upright Oval
Growth Rate: Rapid
Fall Color: Red to Yellow
Pests: None to speak of
Soil: Adaptable except alkaline
Drainage: Moderate to Good

Acer 'Celebration®' was developed at Lake County Nursery in Ohio. As with the other *A. fremanii* hybrids, it was chosen as an improvement over Red Maple cultivars. While it shows a lot of vigor, it does not have the intensely red color of Red Maple cultivars. Still, it is an excellent tree. The upright branches have a wide crotch angle, so breakage is not a problem. 'Celebration®' keeps its very symmetrical form and compact structure with age. High pH or too wet sites should be avoided. Also avoid low marshy ground where *Verticillium* may be present. Robinson Nursery has 'Acer Celebration®' available in whips.
