

Acer x freemanii 'Sienna'

Sienna Glen™ Maple PP11,322

Zone: 3

Height: 60'

Width: 40'

Crown: Broadly Columnar
Growth Rate: Very fast
Soil: Clay, Loam, Sand
pH: Acid, some alkaline
Drought: Tolerant
Breakage: Resistant
Drainage: Adaptable

Acer 'Sienna Glen' is a vigorous hybrid of *Acer rubrum* and *Acer saccharinum*. It has a strong central leader and upright habit. The leaves are very large. Fall color varies depending on geography and microclimates, but can be a very nice orange/red. It is very hardy and withstands wind, ice and snow damage better than 'Acer Autumn Blaze'. Grown from cuttings, there is no chance of incompatibility. 'Sienna Glen' is available from Robinson Nursery in bare root whips and branched trees.
